

1. Average Marks

Write a Python program using NumPy to calculate the average marks of students.

Create an array of marks: 60, 70, 68, 90, 76

Find the average using a NumPy function

Display the result

Code:

```
File Edit Format Run Options Window Help
import numpy as np

marks = np.array([60, 70, 68, 90, 76])
average = np.mean(marks)

print("Average Marks:", average)
|
```

Output:

```
>>
=====
Average Marks: 72.8
>> Average Marks: 72.8
```
